Research from the University of Colorado Denver

**Does your child have a
cochlear implant or hearing aids?**

The University of Colorado Denver
is looking for children
aged 6 months-6 years
who have either cochlear implants or
hearing aids.

Involvement includes participation in speech
and language therapy in person or via the
internet for six months. Speech, listening, and
language tests will be administered twice
throughout the study.

Compensation will be provided for
testing appointments.
